

# Khimsar Group of Hotels

## ENVIRONMENTAL POLICY

At Khimsar Fort, we recognize the impact of our operations on the environment. We are committed to the implementation of proactive measures to help protect and sustain the local, national and global environment for future generations. In an effort to minimize these effects, the Hotel is committed to a policy of sound and responsible environmental management.

Our aim is to:

- Ensure that all employees are aware of the potential environmental effects of their activities. Employees will be encouraged to work in an environmentally responsible manner.
- Comply with all applicable environmental legislations as a minimum standard.
- Seek to conserve natural resources by ensuring the responsible use of water, energy and materials and still provide the quality of service expected by our guests.
- Provide organic products where available and never knowingly use genetically modified products.
- Use of more local products, wherever practicable and in all cases to consider the carbon footprint of such decisions.
- Promote the principle of 'sustainable tourism' by generating greater economic benefits for local people and enhancing the well being of host community. We encourage engagement of our business with local communities
- Promote the principle of 'destination stewardship' to protect the uniqueness of a place so that the future generations-of tourists and locals can enjoy the integrity of its people, its built and natural environment and its wildlife.
- Regularly conduct reviews to ensure that the hotel operations remain compliant with this policy and to set or revise targets to ensure continual improvement for the future.
- To involve and gain support from our customer and make them fully aware of our environmental policy.

You may like to help by:-

- 1) Turning off lights/television and close curtains depending on the season, when you leave the room
- 2) To decide whether you want your bed linen and towels to be changed on daily basis.
- 3) Seek to conserve our natural resources by responsible use of water and energy.

By working together we can create a safe environment and ensure that issues concerning the environment are kept at the forefront and are given proper attention.
